

Researchfish

*A comprehensive research outcomes
and impact evaluation system*

Why choose Researchfish?

National standard with over 90 funding and research organisations using the system.

Currently tracking outcomes on over 42,000 awards.

Over 35,000 researchers now reporting through the system in over 40 countries.

95% compliance rate.

Over £40 billion in awards being tracked in various currencies.

Funders

Researchfish is used by funding organisations to capture the outcomes and ultimately the impact from awards attributed by researchers. By monitoring the progress towards impact this enables better communication of results.

A simple to use permissions-based interface with a comprehensive reporting capability replaces lengthy and expensive data cleaning, organising and analysis.

Dashboard

See real-time updates to outcomes from your awards as they are attributed by researchers, enabling you to track researchers' progress on reporting and share news for fundraising.

Reports

Comprehensively analyse outcomes and export data for use with graphing and reporting tools or copy/paste into other documents.

Reporting nodes

Specify and manage access to awards and outcomes.

Best Practice Monitoring

Compare departments and organisations with consistent tracking of research outcomes.

Monitor progress
towards impact,
reporting outcomes
from awards.

Evidence your
investments.

Collaborate with
funding partners.

Researchers

Portfolio provides a simple to use environment for associating research outcomes with awards and satisfying funder reporting requirements. **CV Builder** draws upon reported outcomes and maintains a current profile for use with funders, publishers, press or others. Using **Delegates**, you may invite delegates to complete outcomes on your behalf. **Research Teams** lets you organise awards requiring multiple team members in different locations.

The common set of outcomes section headings used within the Portfolio are:

- Publications
- Collaborations & Partnerships
- Further Funding
- Next Destination & Skills
- Engagement Activities
- Influence on Policy, Practice, Patients & the Public
- Research Tools & Methods
- Research Databases & Models

- Intellectual Property & Licensing
- Medical Products, Interventions & Clinical Trials
- Artistic & Creative Products
- Software & Technical Products
- Spin Outs
- Awards & Recognition
- Other Outputs & Knowledge/Future Steps
- Use of Facilities & Resources

Additional funder-specific outcomes may also be included within the Portfolio.

We offer a continuous programme of training webinars along with guidance videos and FAQs on our website.

Make your
outcomes visible to
stakeholders.

Signpost potential
impacts to win new
awards.

Build and re-use
personal portfolio of
your research career.

Research Organisations

Researchfish is used by research organisations to view all awards held by its researchers and gives visibility to monitor funder-required submissions by researchers at their organisation.

Researchfish will benefit a research organisation with these key features:

See how university funding and research have helped impact a project.

Analyse across a wide range of research outcomes that have been submitted by researchers.

Identify at a glance which researchers have what awards and the results of their research.

Researchfish streamlines grant administration, reducing the cost and burden on stretched budgets, and yields insights into activity and outcomes.

Ensure compliance with funder requirements.

Gain insight into activity, outcomes, awards and impact progress.

Reduce the reporting burden and expense.

Application

Researchfish is a Software as a Service (SaaS) subscription based application that eliminates local IT resources and includes support for users.

The Researchfish application is designed for quick adoption with no requirement for customer IT skills. Our service is offered via the cloud and is currently hosted on the Amazon EC2 environment that delivers the highest performance levels and an effective method for introducing updates and improvements.

Data Exporting

Data may be exported in a number of formats including CSV and XML. These features are available to authorised users at any time.

Pricing

Our service offers value-for-money to both small and large organisations with inclusive pricing based on a % of grant funding available. Contact us to discuss further.

Support

Ongoing expert support is available 9-5 by email, telephone and live chat facility.

Training

Training is typically on demand and delivered online. We also run a continuous programme of webinars for ongoing training on the different interfaces.

User Groups

Upon subscribing, you may join the user group, which provides an opportunity to learn from colleagues and influence the continuous development programme.
